SCOPE OF AQUACULTURE BUSINESS

ABOUT:

AQUACULTURE is one of the fast growing sector. Aquaculture involves the farming of various commercially important fishes, shrimps, Mud crab and production of Aquarium fishes also. The global demand for seafood is increasing day by day. But most of the demand is fulfilled by natural catch. The supply demand gap is widening due to depleting natural resources like Oceans, Rivers and Lakes.

The only option to fulfill the increasing demand is through **AQUACULTURE** farming only.

Risk Factors:

The Major risk factor involved in this business is maintaining the Bio-mass carefully. If the unit is not properly maintained it may affect the production. Proper feeding and water quality management are the key factors to achieve success.

Theft also another risk factor, proper security measures should be taken care during the operation.

MARKET DEMAND:

Current Global and Domestic market for **AQUACULTURE** product is constantly increasing, currently the global market demand is meet out with less than 10% supply. The Global market is constantly growing and lot of untapped business opportunities are there for the investors.
